

Phalloidin Staining Reagent

Phalloidin

CATALOG #
AAA312907

PRODUCT SYNONYMS

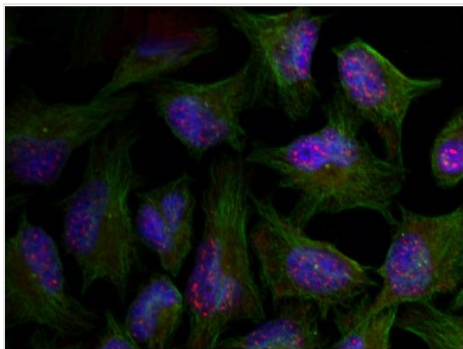

Phalloidin; Phalloidin staining reagent

PRODUCT SPECIFICATIONS

Preparation and Storage

Store at -20°C in dark for 1 year.

IMAGES

Application Data

HeLa cell were stained with AF488 conjugated phalloidin (green) and DAPI (blue).

ADDITIONAL INFORMATION

Related Product Information for Phalloidin staining reagent

Background: Phalloidin is a bicyclic peptide belonging to a family of toxins isolated from the deadly *Amanita phalloides* mushroom¹ and is commonly used in imaging applications to selectively label F-actin. Phalloidin conjugates can be used to visualize and quantify F-actin in cryopreserved tissue sections, cell cultures, or cell-free preparations.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
