

Catalase (CAT) Assay Kit | CAT assay kit

Catalase (CAT) Activity Assay Kit

CATALOG #
AAA31524

PRODUCT SYNONYMS

Catalase (CAT); Catalase (CAT) Activity Assay Kit; CAT assay kit

PRODUCT SPECIFICATIONS

Sequence Length	527
Samples	Serum, Plasma, Animal and Plant Tissues, Cells
Application Notes	Catalase Activity Assay Kit provides a simple and easy colorimetric assay for the study of catalase activity in a variety of biological samples such as cell and tissue lysates or biological fluids. This assay kit utilizes the peroxidatic function of catalase for measuring catalase activity, based on the reaction of catalase with methanol, with the presence of an optimal concentration of H ₂ O ₂ . The formaldehyde produced can be measured colorimetrically at OD 540 nm. Therefore, the catalase activity present in the sample is proportional to the signal obtained.
Preparation and Storage	Store at -20 degree C and keep from light immediately upon receipt. Kit has a storage time of 6 months from receipt. Refer to list of materials supplied for storage conditions of individual components.

ADDITIONAL INFORMATION

Related Product Information for CAT assay kit

Principle of the Assay: Catalase (CAT, EC 1.11.1.6) is a common antioxidant enzyme that catalyzes the decomposition of hydrogen peroxide (H₂O₂) into water and oxygen. It is widely found in aerobic cells containing cytochrome systems. Hydrogen peroxide is highly toxic to cells, and its accumulation leads to oxidation of cellular targets such as DNA, proteins and lipids, leading to mutagenesis and cell death. Protection against oxidative damage to cells is provided by using catalase to remove hydrogen peroxide (H₂O₂) from cells. The role of catalase in oxidative stress-related diseases has been extensively studied. Catalase also shows peroxidation activity in which low molecular weight alcohols can be used as electron donors. Fatty alcohols are specific substrates for catalase; however, other enzymes with peroxidation activity do not utilize these substrates. CheKine™ Micro Catalase (CAT) Activity Assay Kit provides a simple and easy assay for the study of catalase activity in a variety of biological samples such as serum, plasma, cells and tissue lysates or biological fluids. This assay kit utilizes the peroxidase function of catalase for measuring catalase activity, in the presence of an appropriate concentration of H₂O₂, catalase reacts with methanol to produce formaldehyde, which can react with chromogens. The absorbance of the product can be measured at 540 nm. The catalase activity in the sample is proportional to the OD value.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4557014
NCBI GeneID	847
NCBI GenBank Nucleotide #	NP_001743.1
UniProt Accession #	P04040
NCBI Official Full Name	catalase
NCBI Official Synonym Full Names	catalase
NCBI Official Symbol	CAT
NCBI Protein Information	catalase
UniProt Protein Name	Catalase
UniProt Gene Name	CAT
UniProt Entry Name	CATA_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
