

Human Mucin-6 (MUC6) ELISA Kit | MUC6 elisa kit

Human Mucin-6 (MUC6) ELISA Kit

CATALOG #
AAA331613

REACTIVITY
Human

PRODUCT SYNONYMS

Mucin-6 (MUC6); Human Mucin-6 (MUC6) ELISA Kit; MUC6; Mucin 6; gastric; MUC6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Human Mucin-6 (MUC6) ELISA Kit has high sensitivity and excellent specificity for detection of Human MUC6. No significant cross-reactivity or interference between Human MUC6 and analogues was observed.
Sequence Length	2439
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MUC6 elisa kit	Description: This Human Mucin-6 (MUC6) ELISA Kit employs a two-site sandwich ELISA to quantitate MUC6 in samples. An antibody specific for MUC6 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MUC6 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MUC6 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MUC6 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: MUC6 encodes a member of the mucin protein family. Mucins are high molecular weight glycoproteins produced by many epithelial tissues. Mucin-6 encoded by MUC6 is secreted and forms an insoluble mucous barrier that protects the gut lumen.
