ADDITIONAL INFORMATION

Related Product Information for anti-ALPL antibody	There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The product of this gene is a membrane bound glycosylated enzyme that is not expressed in any particular tissue and is, therefore, referred to as the tissue-nonspecific form of the enzyme. Alkaline phosphatases form various dimers in vivo. This antibody can bind the four mentioned alkaline phosphatases.
