

Human C-Reactive ELISA Kit

Human C-Reactive Protein ELISA Kit

CATALOG #
AAA37893

REACTIVITY
Human

PRODUCT SYNONYMS

C-Reactive; Human C-Reactive Protein ELISA Kit; C-Reactive elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	sandwich
Samples	human plasma, serum, milk, urine, saliva, CSF, cell lysate, and cell culture samples
Detection Range	0.25-16ng/ml
Sensitivity	0.25-16ng/ml
Detection Target	C-Reactive Protein (CRP)
Preparation and Storage	Store at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for C-Reactive elisa kit

The Human C-Reactive Protein ELISA Kit employs a quantitative enzyme immunoassay technique that measures C-Reactive Protein (CRP) in Human samples. Strip well format. Reagents for up to 96 tests. It is designed for detection of CRP in human plasma, serum, milk, urine, saliva, CSF, cell lysate, and cell culture samples. This assay employs a quantitative sandwich enzyme immunoassay technique that measures human CRP in less than 4 hours. A murine antibody specific for human CRP has been pre-coated onto a 96-well microplate with removable strips. CRP in standards and samples is sandwiched by the immobilized antibody and a biotinylated polyclonal antibody specific for human CRP, which is recognized by a streptavidin-peroxidase (SP) conjugate. All unbound material is washed away and a peroxidase enzyme substrate is added. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
