

Rabbit Apaf1 Polyclonal Antibody | anti-APAF1 antibody

Apaf1 Antibody

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA40259	Rabbit	Human, Mouse, Rat	Immunohistochemistry, Western Blot, ELISA

PRODUCT SYNONYMS

Apaf1; Polyclonal Antibody; Apaf1 Antibody; CED4; APAF-1; KIAA0413; Apoptotic protease-activating factor 1; apoptotic peptidase activating factor 1; anti-APAF1 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Isotype	IgG
Purity/Purification	Apaf1 Antibody is affinity chromatography purified via peptide column.
Form/Format	Liquid
Sequence Length	1194
Applicable Applications for anti-APAF1 antibody	IHC (Immunohistochemistry), WB (Western Blot), ELISA
Conjugate	Unconjugated
Immunogen	Apaf1 antibody was raised against a peptide corresponding to amino acids near the carboxy terminus of human Apaf1. The sequence of the immunogenic peptide differs from that of murine Apaf1 by one amino acid.
Buffer	Apaf1 Antibody is supplied in PBS containing 0.02% sodium azide.
Preparation and Storage	Apaf1 antibody can be stored at 4 degree C for three months and -20 degree C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

IMAGES

IHC (Immunohistochemistry)

Immunohistochemistry of Apaf1 in human skin tissue with Apaf1 antibody at 20 μg/mL.

WB (Western Blot)

Western blot analysis of Apaf1 in human heart tissue lysate with Apaf1 antibody at 1 μg/mL dilution in the absence (A) or presence (B) of blocking peptide.

ADDITIONAL INFORMATION

Related Product Information for anti-APAF1 antibody	Apaf1 Antibody: Apoptosis is related to many diseases and induced by a family of cell death receptors and their ligands. Cell death signals are transduced by death domain containing adapter molecules and members of the caspase family of proteases. The mammalian homologous of the key cell death gene CED-4 in C. elegans was identified recently from human and mouse and designated Apaf1 for apoptosis protease-activating factor 1. Apaf1 binds to cytochrome c (Apaf2) and caspase-9 (Apaf3), which leads to caspase-9 activation. Activated caspase-9 in turn cleaves and activates caspase-3 that is one of the key proteases, being responsible for the proteolytic cleavage of many key proteins in apoptosis. Apaf1 can also associate with caspase-4 and caspase-8. Apaf1 transcript is ubiquitously expressed in human tissues.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2330015
NCBI GeneID	317
UniProt Accession #	O14727; O43297; Q7Z438; Q9BXZ6; Q9UBZ5; Q9UGN8; Q9UGN9; Q9UGP0; Q9UJ58; Q9UJ59; Q9UJ60; B2RMX8
Molecular Weight	130 kDa
NCBI Official Full Name	apoptotic protease activating factor 1
NCBI Official Synonym Full Names	apoptotic peptidase activating factor 1
NCBI Official Symbol	APAF1
NCBI Official Synonym Symbols	CED4; APAF-1
NCBI Protein Information	apoptotic protease-activating factor 1
UniProt Protein Name	Apoptotic protease-activating factor 1
UniProt Gene Name	APAF1
UniProt Synonym Gene Names	KIAA0413; APAF-1
UniProt Entry Name	APAF_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
