ADDITIONAL INFORMATION

Related Product Information for MBP elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Myelin Basic Protein (also known as MBP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse MBP antibody. MBP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse MBP Antibody is added and binds to MBP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MBP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse MBP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
