ADDITIONAL INFORMATION

Related Product Information for GSTpi elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Glutathione peroxidase (also known as GSH-Px) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human GSH-Px antibody. GSH-Px present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human GSH-Px Antibody is added and binds to GSH-Px in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated GSH-Px antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human GSH-Px. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
