

Human complement factor H precursor, pre-CFH ELISA Kit | pre-CFH elisa kit

Human complement factor H precursor, pre-CFH ELISA Kit

CATALOG #
AAA42204

REACTIVITY
Human

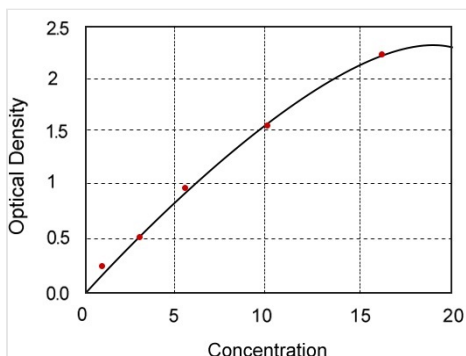

PRODUCT SYNONYMS

complement factor H precursor; pre-CFH; Human complement factor H precursor; pre-CFH ELISA Kit; pre-CFH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	10ng/ml - 4000ng/ml
Sensitivity	5.59ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for pre-CFH elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Complement Factor H Precursor (also known as pre-CFH) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human pre-CFH antibody. pre-CFH present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human pre-CFH Antibody is added and binds to pre-CFH in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated pre-CFH antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human pre-CFH. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
