

Human beta amyloid precursor protein, betaAPP ELISA Kit | betaAPP elisa kit

Human beta amyloid precursor protein, betaAPP ELISA Kit

CATALOG #
AAA42646

REACTIVITY
Human

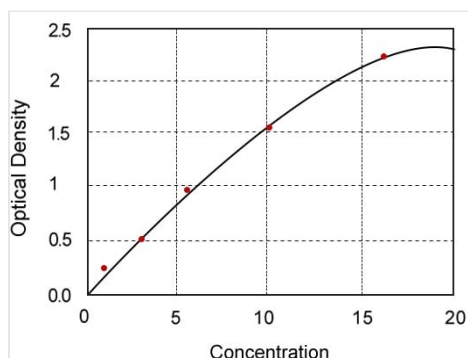

PRODUCT SYNONYMS

beta amyloid precursor protein; betaAPP; Human beta amyloid precursor protein; betaAPP ELISA Kit; betaAPP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.1ng/ml - 40ng/ml.
Sensitivity	0.042ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for betaAPP elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Beta Amyloid Precursor Protein (also known as BAPP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human BAPP antibody. BAPP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human BAPP Antibody is added and binds to BAPP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated BAPP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human BAPP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
