ADDITIONAL INFORMATION

Related Product Information for CFH elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse complement factor H (also known as CHF) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse CHF antibody. CHF present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse CHF Antibody is added and binds to CHF in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CHF antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse CHF. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
