ADDITIONAL INFORMATION

Related Product Information for FCGR2B elisa kit	Description: Sandwich ELISA kit of Quantitative Detection for Mouse CD32/FCGR2b/c Background: CD32 is a surface receptor protein and part of a large population of B cell co-receptors, which act to modulate signaling. It has a low-affinity for IgG antibodies and down-regulates antibody production in the presence of IgG. This feedback loops essentially lowers the production of IgG produced by B cells when there is a surplus in the body.
