

## Rabbit CANDIDA ALBICANS Polyclonal Antibody

RABBIT ANTI CANDIDA ALBICANS

| CATALOG # | HOST   | REACTIVITY                 | APPLICATIONS                                    |
|-----------|--------|----------------------------|-------------------------------------------------|
| AAA49865  | Rabbit | Does not react with: Human | Immunofluorescence, ELISA, Immunohistochemistry |

### PRODUCT SYNONYMS

CANDIDA ALBICANS; Polyclonal Antibody; RABBIT ANTI CANDIDA ALBICANS; anti-CANDIDA ALBICANS antibody

### PRODUCT SPECIFICATIONS

|                                                            |                                                                                                                                                                                                                                                                                                                                                                |

| Host                                                       | Rabbit                                                                                                                                                                                                                                                                                                                                                         |
| Reactivity                                                 | Does not react with: Human                                                                                                                                                                                                                                                                                                                                     |
| Clonality                                                  | Polyclonal                                                                                                                                                                                                                                                                                                                                                     |
| Isotype                                                    | IgG                                                                                                                                                                                                                                                                                                                                                            |
| Specificity                                                | Candida Albicans Type A                                                                                                                                                                                                                                                                                                                                        |
| Form/Format                                                | Purified<br>Ig fraction - liquid                                                                                                                                                                                                                                                                                                                               |
| Concentration                                              | Approximate Protein Concentration: 4.0 mg/ml (varies by lot)                                                                                                                                                                                                                                                                                                   |
| Applicable Applications for anti-CANDIDA ALBICANS antibody | IF (Immunofluorescence), ELISA, IHC (Immunohistochemistry)                                                                                                                                                                                                                                                                                                     |
| Perservative Stabilisers                                   | 0.1% Sodium Azide (NaN <sub>3</sub> )                                                                                                                                                                                                                                                                                                                          |
| Immunogen                                                  | Candida albicans, type A                                                                                                                                                                                                                                                                                                                                       |
| Buffer Solution                                            | Phosphate buffered saline                                                                                                                                                                                                                                                                                                                                      |
| Target Species                                             | Yeast                                                                                                                                                                                                                                                                                                                                                          |
| Preparation and Storage                                    | Store at 4 degree C or at -20 degree C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.<br>Shelf Life: 18 months from date of despatch. |

### ADDITIONAL INFORMATION

|                                                                |                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-CANDIDA ALBICANS antibody | Rabbit anti Candida albicans Type A antibody reacts with numerous proteins in a soluble C. albicans extract in immunoelectrophoresis. Candida albicans is the most frequently isolated fungal pathogen of humans. It principally infects the skin and mucosal surfaces causing candidiasis or thrush. This antibody has not been absorbed and cross reacts with other yeasts. |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
