

## Mouse Chromogranin A (CHGA) ELISA Kit | CHGA elisa kit

Mouse Chromogranin A (CHGA) ELISA Kit

CATALOG #  
**AAA53012**

REACTIVITY  
**Mouse**

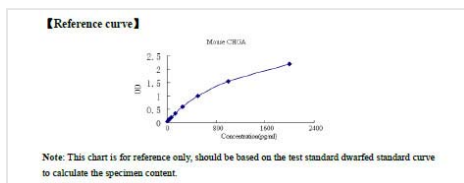

### PRODUCT SYNONYMS

Chromogranin A (CHGA); Mouse Chromogranin A (CHGA) ELISA Kit; CHGA elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                               |
| Specificity             | No cross-reaction with other factors.                                                                               |
| Sequence Length         | 457                                                                                                                 |
| Samples                 | Mouse serum, plasma or cell culture supernatant and organizations in the natural and recombinant CHGA concentration |
| Assay Type              | Sandwich                                                                                                            |
| Detection Range         | 2000 pg/ml-31.2 pg/ml                                                                                               |
| Sensitivity             | 12 pg/ml                                                                                                            |
| Intra-assay Precision   | <= 8%                                                                                                               |
| Inter-assay Precision   | <= 12%                                                                                                              |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                 |

### ADDITIONAL INFORMATION

#### Related Product Information for CHGA elisa kit

Principle of the Assay: This experiment use double-sandwich elisa technique and the ELISA Kit provided is typical. The pre-coated antibody is Mouse CHGA monoclonal antibody and the detecting antibody is polyclonal antibody with biotin labeled. Samples and biotin labeling antibody are added into ELISA plate wells and washed out with PBS or TBS. Then Avidin-peroxidase conjugates are added to ELISA wells in order; Use TMB substrate for coloring after reactant thoroughly washed out by PBS or TBS. TMB turns into blue in peroxidase catalytic and finally turns into yellow under the action of acid. The color depth and the testing factors in samples are positively correlated.

### NCBI AND UNIPROT INFORMATION

|                  |           |
|------------------|-----------|
| NCBI GI #        | 180527    |
| Molecular Weight | 50,688 Da |

|                            |                |
|----------------------------|----------------|
| NCBI Official Full Name    | chromogranin A |
| UniProt Protein Name       | Chromogranin-A |
| UniProt Gene Name          | <b>CHGA</b>    |
| UniProt Synonym Gene Names | CgA; SP-I      |
| UniProt Entry Name         | CMGA_HUMAN     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
