

Human Tetanus ELISA Kit

Human Tetanus Antibody ELISA Kit

CATALOG #
AAA55420

REACTIVITY
Human

PRODUCT SYNONYMS

Tetanus; Human Tetanus Antibody ELISA Kit; Tetanus elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human TAb. No significant cross-reactivity or interference between Human TAb and analogues was observed.
Samples	Solid Samples (Feces).
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Tetanus elisa kit

Intended Uses: For the qualitative detection of Human Rotavirus IgM antibody (RV-Ab-IgM) concentration in solid samples (feces).

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with Anti-RV-Ab-IgM. Samples are then added to the appropriate microtiter plate wells with a Horseradish Peroxidase (HRP)-conjugated Anti-RV-Ab-IgM and incubated. Then substrate solutions are added to each well. Only those wells that contain RV-Ab-IgM and enzyme-conjugated Anti-RV-Ab-IgM will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
