

Clenbuterol ELISA Kit

Clenbuterol ELISA Kit

CATALOG #
AAA55607

PRODUCT SYNONYMS

Clenbuterol; Clenbuterol ELISA Kit; Clenbuterol elisa kit

PRODUCT SPECIFICATIONS

Samples	Meat/liver, urine, serum, feed, etc.
Assay Type	Competitive ELISA
Detection Range	0.05-4.05 ppb
Sensitivity	0.05 ppb
Sample Volume	10-200 uL
Detection Wavelength	450 nm
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Clenbuterol elisa kit

Principle of the Assay: This assay is based on the competitive enzyme immunoassay for the detection of CLE in the sample. The coupling antigen is pre-coated on the micro-well stripes. The CLE in the sample and the coupling antigens pre-coated on the micro-well stripes compete for the anti-CLE antibodies. After the addition of the enzyme conjugate, the TMB substrate is added for coloration. The optical density (OD) value of the sample has a negative correlation with the CLE in the sample. This value is compared to the standard curve and the CLE residues is subsequently obtained.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
