

Human Rotavirus ELISA Kit | RV-IgM elisa kit

Human Rotavirus (RV-IgM) ELISA Kit

CATALOG #
AAA55835

REACTIVITY
Human

PRODUCT SYNONYMS

Rotavirus; Human Rotavirus (RV-IgM) ELISA Kit; RV-IgM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Solid samples (feces)
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for RV-IgM elisa kit

Intended Uses: For the qualitative detection of Human Rotavirus IgM antibody (RV-Ab-IgM) concentration in solid samples (feces).

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with Anti-RV-Ab-IgM. Samples are then added to the appropriate microtiter plate wells with a Horseradish Peroxidase (HRP)-conjugated Anti-RV-Ab-IgM and incubated. Then substrate solutions are added to each well. Only those wells that contain RV-Ab-IgM and enzyme-conjugated Anti-RV-Ab-IgM will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
