

Human Hepatic lipase ELISA Kit | HL elisa kit

Human Hepatic lipase (HL) ELISA Kit

CATALOG #
AAA55876

REACTIVITY
Human

PRODUCT SYNONYMS

Hepatic lipase; Human Hepatic lipase (HL) ELISA Kit; HL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human HL. No significant cross-reactivity or interference between Human HL and analogues was observed.
Samples	Serum, Plasma, Other biological fluids
Assay Type	Sandwich
Sample Volume	1-200 uL
Precision	Intra-assay Precision (Precision within an assay) Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision. Inter-assay Precision (Precision between assays) Three samples of known concentration were tested in forty separate assays to assess inter-assay precision. $CV (\%) = SD/mean \times 100$ Intra-Assay: CV Inter-Assay: CV
Detection Wavelength	450 nm
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HL elisa kit

Principle of the Assay: This assay employs a two-site sandwich ELISA to quantitate HL in samples. An antibody specific for HL has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any HL present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for HL is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of HL bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
