

Human Influenza A virus IgM antibody (FluA-Ab-IgM) ELISA Kit

Human Influenza A virus IgM antibody (FluA-Ab-IgM) ELISA Kit

CATALOG #
AAA55986

REACTIVITY
Human

PRODUCT SYNONYMS

Influenza A virus IgM antibody (FluA-Ab-IgM); Human Influenza A virus IgM antibody (FluA-Ab-IgM) ELISA Kit; Influenza A virus IgM antibody (FluA-Ab-IgM) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma and other biological fluids
Preparation and Storage	Store at 2 to 8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Influenza A virus IgM antibody (FluA-Ab-IgM) elisa kit

Intended Uses: For the qualitative detection of Human Influenza A virus IgM antibody (FluA-Ab-IgM) in serum, plasma and other biological fluids.

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with FluA. Standards or samples are then added to the appropriate microtiter plate wells with FluA-Ab-IgM and a Horseradish Peroxidase (HRP)-conjugated Anti-Human IgM (u chain) and incubated. Then substrate solutions are added to each well. Only those wells that contain FluA-Ab-IgM and enzyme-conjugated Anti-Human IgM (u chain) will exhibit a change in color. The enzymesubstrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
