

Human Hepatitis C Virus Core Antigen (HCV-core Ag) ELISA Kit | HCV-core Ag elisa kit

Human Hepatitis C Virus Core Antigen (HCV-core Ag) ELISA Kit

CATALOG #
AAA56017

REACTIVITY
Human

PRODUCT SYNONYMS

Hepatitis C Virus Core Antigen (HCV-core Ag); Human Hepatitis C Virus Core Antigen (HCV-core Ag) ELISA Kit; HCV-core Ag elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma and other biological fluids
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HCV-core Ag elisa kit

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with HCV-core Ab. Samples are then added to the appropriate microtiter plate wells with a Horseradish Peroxidase (HRP)-conjugated HCV-core Ab and incubated. Then substrate solutions are added to each well. Only those wells that contain HCV-core Ag and enzyme-conjugated HCV-core Ab will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm $\pm$ 2 nm.

Intended Uses: For the qualitative detection of Human Hepatitis C Virus Core Antigen (HCV-core Ag) concentration in serum, plasma and other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
