

Rabbit Leptospira Polyclonal Antibody

Leptospira biflexa

CATALOG # AAA58498	HOST Rabbit
------------------------------	-----------------------

PRODUCT SYNONYMS

Leptospira; Polyclonal Antibody; Leptospira biflexa; Leptospira biflexa Antiserum Products; anti-Leptospira antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Clonality	Polyclonal
Specificity	All antigens
Form/Format	FITC
Immunogen	Whole organism
Antiserum Characterization	(neat)

ADDITIONAL INFORMATION

Related Product Information for anti-Leptospira antibody	This product consists of purified IgG fraction of the above antiserum covalently coupled with high purity Isomer I of fluorescein isothiocyanate. Care is taken to ensure complete removal of any free fluorescein from the final product. The product is formulated in a phosphate saline buffer (0.01M, pH 7.2) containing bovine serum albumin (10 mg/ml) as a stabilizer and 0.1% sodium azide preservative. Applications for this product include direct FA staining of target antigens in a permissive tissue culture system. Working dilution must be determined by the user for his or her application but a starting range of 1:10 - 1:50 is suggested. Acetone fixation of the antigen source is recommended prior to staining. ViroStat also recommends use of its COUNTERSTAIN/BLOCKING DILUENT (Cat.#4400) and its MOUNTING MEDIUM (Cat.#4300) for optimum product performance. Enzyme amplification following reaction with FITC conjugate can also be accomplished utilizing ViroStat's enzyme-antibody conjugates specific to FITC (Cat.#s 3104 & 3105). Recommended short term (<6 months) storage is liquid at 2-8 degree C under subdued light. For longer term storage, aliquot and freeze. Immunoglobulin concentration is 4-5 mg/ml. Unit size is 1.0 ml.
Product Categories/Family for anti-Leptospira antibody	OMNITOPE Polyclonal Antibodies

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
