ADDITIONAL INFORMATION

Related Product Information for anti-GLUT1 antibody	Glucose transporter type I (GLUT1), also known as SCL2A1, is a glucose transporter present in the blood-brain barrier and erythrocytes. GLUT1 overexpression is associated with tumour progression or poor prognoses of bladder, breast, cervical, colon, and lung carcinomas, as well as mesothelioma. Anti-GLUT1 is useful for distinguishing malignant mesothelioma (GLUT1(+)) from reactive mesothelium (GLUT1(-)).
