

Mouse anti-Human CD10 Monoclonal Antibody | anti-CD10 antibody

CD10

CATALOG # AAA58797	HOST Mouse	REACTIVITY Human
------------------------------	----------------------	----------------------------

PRODUCT SYNONYMS

CD10; Monoclonal Antibody; anti-CD10 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG1
Positive Control	Kidney, Lymph Node, Tonsil

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)
CD10 [AAA58797] on Kidney

ADDITIONAL INFORMATION

Related Product Information for anti-CD10 antibody

Cluster of Differentiation 10 (CD10) is a cell surface metalloendopeptidase that cleaves and inactivates several peptide hormones including glucagon, enkephalins, and oxytocin. Also known as Common Acute Lymphoblastic Leukemia Antigen (CALLA), it is an important cell surface marker in the identification of human ALL (Acute Lymphocytic Leukemia), and is found positive in precursor B lymphoblastic leukemia/lymphoma, angioimmunoblastic T-cell lymphoma, Burkitt's lymphoma, and follicular germinal center lymphoma. CD10 expression has also been reported in a variety of non-hematolymphoid tissues, particularly of the kidney. It is a useful aid in the identification of various malignant tumours such as renal cell carcinoma, endometrial stromal sarcoma, and hepatocellular carcinoma.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
