

Mouse anti-Human Villin Monoclonal Antibody

Villin

CATALOG # AAA58808	HOST Mouse	REACTIVITY Human
------------------------------	----------------------	----------------------------

PRODUCT SYNONYMS

Villin; Monoclonal Antibody; anti-Villin antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG1
Positive Control	Colon

IMAGES

Product Format	Dilution
Predilute	Ready to Use
Concentrate	1:50-1:200

Dilution Info

IHC (Immunohistochemistry)
Villin [AAA58808] on Colon

ADDITIONAL INFORMATION

Related Product Information for anti-Villin antibody

Villin is a tissue-specific actin-binding glycoprotein that is associated with the maintenance of the microvilli brush border found in the gastrointestinal mucosal epithelium. Villin is expressed in carcinomas of the gastrointestinal tract, renal cell carcinomas, pancreatic carcinomas, endometrial carcinomas, as well as carcinomas of the ovary and lungs. Anti-Villin antibodies can be useful for identifying and differentiating adenocarcinomas of these organs from other organs in the body. Additionally, it may be helpful in separating carcinoid tumors from other endocrine tumors.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
