

Human PEDF ELISA Kit | SERPINF1 elisa kit

Human PEDF ELISA kit

CATALOG #
AAA60688

REACTIVITY
Human

PRODUCT SYNONYMS

PEDF; Human PEDF ELISA kit; SERPINF1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	418
Immunogen	human recombinant PEDF
Preparation and Storage	Store at 4 degree C. DO NOT FREEZE. Product is stable for at least six months from date of shipment.

ADDITIONAL INFORMATION

Related Product Information for SERPINF1 elisa kit

Principle of the Assay: Microwells are coated with a polyclonal antibody specific for full-length recombinant human PEDF antigen. The PEDF antigen present in the specimen is specifically captured onto the immobilized antibody during specimen incubation. The captured antigen is then detected with a high-titer polyclonal anti-PEDF antibody conjugated to biotin. Following subsequent incubation with streptavidin peroxidase, the bound enzyme reacts with a substrate to yield a colored product. The resultant optical density is proportional to the amount of PEDF antigen present in the specimen.

NCBI AND UNIPROT INFORMATION

NCBI GI #	39725934
NCBI GeneID	5176
NCBI Accession #	NP_002606.3
NCBI GenBank Nucleotide #	NM_002615.5
NCBI Official Full Name	pigment epithelium-derived factor
NCBI Official Synonym Full Names	serpin peptidase inhibitor, clade F (alpha-2 antiplasmin, pigment epithelium derived factor), member 1
NCBI Official Symbol	SERPINF1

NCBI Official Synonym Symbols	OI6; OI12; PEDF; EPC-1; PIG35
NCBI Protein Information	pigment epithelium-derived factor; serpin F1; cell proliferation-inducing gene 35 protein; serine (or cysteine) proteinase inhibitor, clade F (alpha-2 antiplasmin, pigment epithelium derived factor), member 1

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
