

Nef (HIV-1/Clade A) Polyclonal Antibody | anti-Nef antibody

Anti-Nef (HIV-1/Clade A), rabbit IgG

CATALOG #
AAA62115

APPLICATIONS
Western Blot

PRODUCT SYNONYMS

Nef (HIV-1/Clade A); Polyclonal Antibody; Anti-Nef (HIV-1/Clade A); rabbit IgG; anti-Nef antibody

PRODUCT SPECIFICATIONS

Clonality	Polyclonal
Isotype	IgG
Specificity	Reacts with Nef protein from HIV-1/Clade A viruses. Cross-reactivity to Nef from other clades not tested.
Purity/Purification	Immunoaffinity chromatography.
Concentration	2 ug/ul in PBS with less than 0.1% gelatin and 0.1% sodium azide. (varies by lot)
Applicable Applications for anti-Nef antibody	WB (Western Blot)
Description	Rabbit polyclonal antibody.
Immunogen	in vivo expressed Nef (HIV-1/Clade A) protein (Genebank accession #AF084657)
Preparation and Storage	Store at -20 degree C; Stable for 6-months from the date of shipment when kept at 4 degree C. Non-hazardous. No MSDS required.

IMAGES

WB (Western Blot)

C: 293 cell extract control; E: 293 cell expressing Nef

ADDITIONAL INFORMATION

Related Product Information for anti-Nef antibody

Nef (Negative Regulatory Factor) is a small 27-35 kDa myristoylated protein encoded by primate lentiviruses. These include Human Immunodeficiency Viruses (HIV-1 and HIV-2) and Simian Immunodeficiency Virus (SIV). Nef localizes primarily to the cytoplasm but also partially to the Plasma Membrane (PM) and is one of many pathogen-expressed proteins, known as virulence factors, which function to manipulate the host's cellular machinery and thus allow infection, survival or replication of the pathogen.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
