Related Product Information for cAMP 384-Well elisa kit

Description: Elite cAMP 384-Well ELISA Kit provides the sensitive method for detecting adenylate cyclase activity in biochemical or cell-based assay system. Compared to other ELISA cAMP assay kits, our kit eliminates the tedious acetylation step. The kit uses Elite Red as a fluorimetric substrate to quantify the HRP activity. The high sensitivity (as low as 0.1 nM) make it superior to any other known kits that are colorimetric-based or fluorescence-based.
