ADDITIONAL INFORMATION

Related Product Information for HBeAg recombinant protein	6x his tagged HBV recombinant e-antigen (HBeAg) (aa 1-212) (Genebank Accession No. P0C6G7) HBeAg stands for hepatitis B "e" antigen. This antigen is a protein from the hepatitis B virus that circulates in infected blood when the virus is actively replicating. HBeAg is the extracellular form of HBcAg. Both HBeAg and HBcAg are made from the same reading frame, but HBeAg is secreted from cells and accumulates in serum as an immunologically distinct soluble antigen.
