### PRODUCT SYNONYMS

gapA; Polyclonal Antibody; anti-gapA; type I glyceraldehyde 3-phosphate dehydrogenase; GAPDH antibody; anti-gapA antibody

### PRODUCT SPECIFICATIONS

|                                                |                                                                                       |
|------------------------------------------------|---------------------------------------------------------------------------------------|
| Host                                           | Goat                                                                                  |
| Reactivity                                     | Microbacterium                                                                        |
| Clonality                                      | Polyclonal                                                                            |
| Isotype                                        | IgG                                                                                   |
| Specificity                                    | Detects endogenous levels of gapA by Western blot.                                    |
| Purity/Purification                            | Epitope affinity purified                                                             |
| Form/Format                                    | PBS, 20% glycerol and 0.05% sodium azide                                              |
| Applicable Applications for anti-gapA antibody | WB (Western Blot)                                                                     |
| Conjugation                                    | Unconjugated                                                                          |
| Immunogen                                      | Recombinant peptide (176 aa - stop) derived from Microbacterium sp produced in E Coli |
| Preparation and Storage                        | Store at -20 C for long-term storage. Store at 2-8 C for up to one month.             |

Reactivity Data

#### Application Data

Anti-gapA Ab at 1/1,000 dilution; lane with 30 ng of recombinant fusion protein (176 aa - stop) from Microbacterium sp; rabbit polyclonal to goat IgG (HRP) at 1/10,000 dilution;

### ADDITIONAL INFORMATION

**Related Product Information for anti-gapA antibody**

Goat polyclonal antibody to gapA from Microbacterium sp.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
