

Human Translocation Associated Membrane Protein 1 (TRAM1) ELISA Kit | TRAM1 elisa kit

Human Translocation Associated Membrane Protein 1 (TRAM1) ELISA Kit

CATALOG #
AAA65014

REACTIVITY
Human

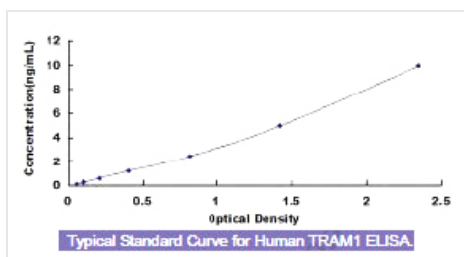

PRODUCT SYNONYMS

Translocation Associated Membrane Protein 1 (TRAM1); Human Translocation Associated Membrane Protein 1 (TRAM1) ELISA Kit; TRAM; TRAMP; Translocating chain-associated membrane protein 1; TRAM1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TRAM1. No significant cross-reactivity or interference between TRAM1 and analogues was observed.
Sequence Length	343
Samples	Tissue homogenates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.156-10ng/mL
Sensitivity	0.059ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level TRAM1 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level TRAM1 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for TRAM1 elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TRAM1 in human tissue homogenates and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to TRAM1. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to TRAM1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain TRAM1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of TRAM1 in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	961349559
NCBI GeneID	23471
NCBI Accession #	NP_001304733.1
NCBI GenBank Nucleotide #	NM_001317804.1
UniProt Accession #	Q15629; B4E0K2
Molecular Weight	39,683 Da
NCBI Official Full Name	translocating chain-associated membrane protein 1 isoform 2
NCBI Official Synonym Full Names	translocation associated membrane protein 1
NCBI Official Symbol	TRAM1
NCBI Official Synonym Symbols	TRAM; PNAS8; TRAMP
NCBI Protein Information	translocating chain-associated membrane protein 1
UniProt Protein Name	Translocating chain-associated membrane protein 1
UniProt Gene Name	TRAM1
UniProt Synonym Gene Names	TRAM

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
