

Human Sarcolipin (SLN) ELISA Kit | SLN elisa kit

Human Sarcolipin (SLN) ELISA Kit

CATALOG #
AAA65111

REACTIVITY
Human

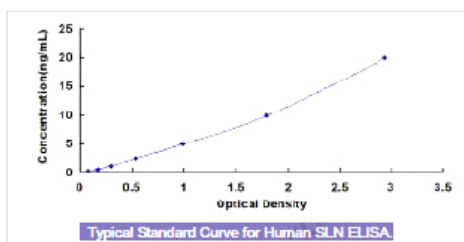

PRODUCT SYNONYMS

Sarcolipin (SLN); Human Sarcolipin (SLN) ELISA Kit; C20orf16; PAO-1; PAOh1; Polyamine oxidase 1; SMO; Spermine oxidase; SLN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of SLN. No significant cross-reactivity or interference between SLN and analogues was observed.
Sequence Length	31
Samples	Tissue homogenates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.312-20ng/mL
Sensitivity	0.121ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level SLN were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level SLN were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for SLN elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of SLN in human tissue homogenates and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to SLN. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to SLN. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SLN, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of SLN in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4507063
NCBI GeneID	6588
NCBI Accession #	NP_003054.1
NCBI GenBank Nucleotide #	NM_003063.2
UniProt Accession #	O00631; Q6ICV3
Molecular Weight	3,762 Da
NCBI Official Full Name	sarcolipin
NCBI Official Synonym Full Names	sarcolipin
NCBI Official Symbol	SLN
NCBI Protein Information	sarcolipin
UniProt Protein Name	Sarcolipin
UniProt Gene Name	SLN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
