

General Corticosterone (CORT) ELISA Kit | CORT elisa kit

General Corticosterone (CORT) ELISA Kit

CATALOG #
AAA65637

REACTIVITY
General

PRODUCT SYNONYMS

Corticosterone (CORT); General Corticosterone (CORT) ELISA Kit; Corticosrone; CORT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of CORT. No significant cross-reactivity or interference between CORT and analogues was observed.
Samples	Serum, plasma, urine and other biological fluids.
Assay Type	Competitive inhibition
Detection Range	7.812-500ng/mL
Sensitivity	2.62ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level CORT were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level CORT were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for CORT elisa kit

Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of CORT in serum, plasma, urine and other biological fluids.

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to CORT has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled CORT and unlabeled CORT (Standards or samples) with the pre-coated antibody specific to CORT. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of CORT in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of CORT in the sample.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
