

Canine Endoglin (ENG) ELISA Kit | ENG elisa kit

Canine Endoglin (ENG) ELISA Kit

CATALOG #
AAA67460

REACTIVITY
Canine

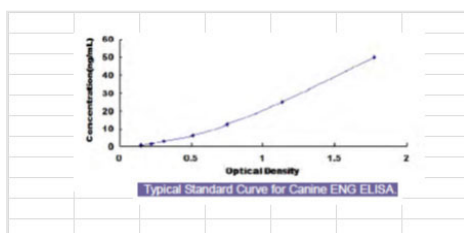

PRODUCT SYNONYMS

Endoglin (ENG); Canine Endoglin (ENG) ELISA Kit; CD105 END HHT1 ORW ORW1 Osler-Rendu-Weber Syndrome 1; ENG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of ENG. No significant cross-reactivity or interference between ENG and analogues was observed.
Sequence Length	652
Samples	Serum, plasma and other biological fluids.
Assay Type	Sandwich
Detection Range	0.781-50ng/mL
Sensitivity	0.33ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level ENG were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level ENG were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kit, all reagents should be kept according to the labels on vials. The TMB Substrate, Wash Buffer, Stop Solution should be stored at 4 degree C. All others should be stored at -20 degree C.

ADDITIONAL INFORMATION

Related Product Information for ENG elisa kit	Intended Uses: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ENG in canine serum, plasma and other biological fluids. Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to ENG. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to ENG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ENG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of ENG in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	545513241
NCBI GeneID	609166
NCBI Accession #	XP_005625387.1
NCBI GenBank Nucleotide #	XP_005625387.1
UniProt Accession #	J9P7F0
Molecular Weight	70,198 Da
NCBI Official Full Name	endoglin
NCBI Official Symbol	ENG
NCBI Protein Information	endoglin
UniProt Protein Name	Uncharacterized protein
UniProt Gene Name	ENG

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
