

Dog Alpha-Fetoprotein (aFP) RTU ELISA Kit | aFP rtu elisa kit

Canine Alpha-Fetoprotein (aFP) ELISA Kit

CATALOG #
AAA68938

REACTIVITY
Dog

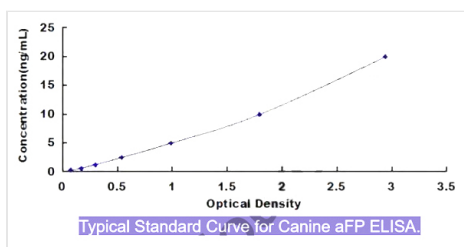

PRODUCT SYNONYMS

Alpha-Fetoprotein (aFP); Canine Alpha-Fetoprotein (aFP) ELISA Kit; A-FP; FETA; HPAPF; Alpha-Fetoglobulin; Alpha-1-fetoprotein; aFP rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Dog
Specificity	This assay has high sensitivity and excellent specificity for detection of aFP. No significant cross-reactivity or interference between aFP and analogues was observed.
Sequence Length	609
Assay Type	Quantitative Sandwich
Samples	Canine serum, plasma or other biological fluids
Detection Range	0.312-20ng/mL
Sensitivity	< 0.133ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level aFP were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level aFP were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for aFP rtu elisa kit	Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to aFP. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to aFP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain aFP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of aFP in the samples is then determined by comparing the O.D. of the samples to the standard curve. Intended Uses: The kit is a sandwich enzyme immunoassay for the in vitro quantitative measurement of aFP in canine serum, plasma or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	50978658
NCBI GeneID	403551
NCBI Accession #	NP_001003027.1
NCBI GenBank Nucleotide #	NM_001003027.1
UniProt Accession #	Q8MJU5
Molecular Weight	68,783 Da
NCBI Official Full Name	alpha-fetoprotein
NCBI Official Synonym Full Names	alpha fetoprotein
NCBI Official Symbol	AFP
NCBI Protein Information	alpha-fetoprotein
UniProt Protein Name	Alpha-fetoprotein
UniProt Gene Name	AFP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
