

Human Apolipoprotein O (APOO) RTU ELISA Kit | APOO rtu elisa kit

Human Apolipoprotein O (APOO) ELISA Kit

CATALOG #
AAA69175

REACTIVITY
Human

PRODUCT SYNONYMS

Apolipoprotein O (APOO); Human Apolipoprotein O (APOO) ELISA Kit; Apo-O; FAM121B; My025; Family With Sequence Similarity 121B; APOO rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	198
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates or Other Biological Fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.073ng/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for APOO rtu elisa kit

Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to APOO. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to APOO. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain APOO, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of APOO in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #

[13129148](#)

NCBI GeneID	79135
NCBI Accession #	NP_077027.1
NCBI GenBank Nucleotide #	NM_024122.4
UniProt Accession #	Q9BUR5 ; Q9H3J9 ; B2R4K9
Molecular Weight	20,199 Da
NCBI Official Full Name	MICOS complex subunit MIC26
NCBI Official Synonym Full Names	apolipoprotein O
NCBI Official Symbol	APOO
NCBI Official Synonym Symbols	MIC26; Mic23; My025; FAM121B
NCBI Protein Information	MICOS complex subunit MIC26
UniProt Protein Name	MICOS complex subunit MIC26
UniProt Gene Name	APOO

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
