

Chicken Brain Derived Neurotrophic Factor (BDNF) RTU ELISA Kit | BDNF rtu elisa kit

Chicken Brain Derived Neurotrophic Factor (BDNF) ELISA Kit

CATALOG # AAA69331	REACTIVITY Chicken
------------------------------	------------------------------

PRODUCT SYNONYMS

Brain Derived Neurotrophic Factor (BDNF); Chicken Brain Derived Neurotrophic Factor (BDNF) ELISA Kit; Neurotrophin; Abreineurin; BDNF rtu elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Sequence Length	246
Assay Type	Sandwich
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates or Other Biological Fluids.
Detection Range	0.156-10ng/mL
Sensitivity	0.065ng/mL
RTU ELISA Kit's Advantage	The Ready-To-Use (RTU) Kits require fewer steps in setup and take less time to run. Detection Solutions are pre-diluted and total incubation time is shorter than many other ELISA Kits.
Preparation and Storage	For unopened kits: All the reagents should be kept at 4 degree C upon receipt. For opened kits: Once the kit is opened, the remaining reagents still need to be stored according to the above storage conditions. In addition, return the unused wells to the foil pouch containing the desiccant pack and reseal along entire edge of zip-seal.

ADDITIONAL INFORMATION

Related Product Information for BDNF rtu elisa kit	Test Principle: The microtiter plate provided in this kit has been pre-coated with an antibody specific to BDNF. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific to BDNF. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain BDNF, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of BDNF in the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	71979935
-----------	----------

NCBI GeneID	396186
NCBI Accession #	NP_001026787.1
NCBI GenBank Nucleotide #	NM_001031616.1
UniProt Accession #	P25429 ; Q45N27
Molecular Weight	27,715 Da
NCBI Official Full Name	brain-derived neurotrophic factor
NCBI Official Synonym Full Names	brain derived neurotrophic factor
NCBI Official Symbol	BDNF
NCBI Protein Information	brain-derived neurotrophic factor
UniProt Protein Name	Brain-derived neurotrophic factor
UniProt Gene Name	BDNF
UniProt Synonym Gene Names	BDNF

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
