ELISA
Binding curve of anti-SARS-Cov-2 (COVID-19) & SARS-CoV Nucleoprotein antibody CR3018 (03-018) to SARS-CoV-2 Nucleoproteins (REC31812 and REC31851). ELISA Plate coated with SARS-CoV-2 Nucleoproteins (REC31812/REC31851; Native Antigen Company) at a concentration of 5ug/ml. A 3-fold serial dilution from 10,000 ng/ml was performed using For detection, a 1:4000 dilution of HRP-labelled anti-rabbit antibody was used. Rabbit anti-Fluorescein [4-4-20 (enhanced)] antibody was used as a control.

ADDITIONAL INFORMATION

Related Product Information for anti-Covid-19 antibody	Recombinant monoclonal antibody to Covid-19 & SARS-CoV Nucleoprotein. Recombinant Platform with variable regions (i.e. specificity) from the phage-display antibody CR3018 (03-018). The original antibody was generated by cloning the variable regions of the scFvs selected from phage display libraries into separate vectors for IgG1 heavy-chain and light-chain expression. The harvested supernatants were then purified on protein A columns. The original immunogen was the whole irradiated virion.
Product Categories/Family for anti-Covid-19 antibody	virus; virology; SARS; coronavirus
