

## Etanercept ELISA Kit

Etanercept ELISA Kit

CATALOG #  
**AAA72580**

### PRODUCT SYNONYMS

Etanercept; Etanercept ELISA Kit; Etanercept elisa kit

### PRODUCT SPECIFICATIONS

|         |                        |
|---------|------------------------|
| Samples | Human Serum And Plasma |
|---------|------------------------|

### ADDITIONAL INFORMATION

#### Related Product Information for Etanercept elisa kit

Intended Uses: Enzyme Immunoassay for the determination of C-Reactive Protein in human serum and plasma. For research use only.

Principle of the Assay: Microtiterstrips coated with anti-CRP antibody are incubated with diluted standard sera and samples. During this incubation step CRP is bound specifically to the wells. After removal of the unbound serum proteins by a washing procedure, the antigen-antibody complex in each well is detected with specific peroxidase-conjugated antibodies. After removal of the unbound conjugate, the strips are incubated with a chromogen solution containing tetramethylbenzidine and hydrogen peroxide: a blue colour develops in proportion to the amount of immunocomplex bound to the wells of the strips. The enzymatic reaction is stopped by the addition of 0.5M H<sub>2</sub>SO<sub>4</sub> and the absorbance values at 450 nm are determined. A standard curve is obtained by plotting the absorbance values versus the corresponding standard values. The concentration of CRP in samples is determined by interpolation from the standard curve.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
