

Human Toxoplasma IgM ELISA Kit

Toxoplasma IgM ELISA

CATALOG #
AAA72602

REACTIVITY
Human

PRODUCT SYNONYMS

Toxoplasma IgM; Toxoplasma IgM ELISA; Toxoplasma IgM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum or plasma
Preparation and Storage	2 - 8 degree C

ADDITIONAL INFORMATION

Related Product Information for Toxoplasma IgM elisa kit	Intended Uses: The Toxoplasma IgM ELISA kit is intended for the detection of IgM antibody to Toxoplasma in human serum or plasma. For research use only, Principle of the Assay: Diluted serum (serum diluent contains sorbent to remove Rheumatoid Factor and human IgG interference) is added to the wells coated with purified antigen. IgM specific antibody, if present, binds to the antigen. All unbound materials are washed away and the enzyme conjugate is added to bind to the antibody-antigen complex, if present. Excess enzyme conjugate is washed off and substrate is added. The plate is incubated to allow the hydrolysis of the substrate by the enzyme. The intensity of the color generated is proportional to the amount of IgM specific antibody in the sample.
Product Categories/Family for Toxoplasma IgM elisa kit	Infectious Disease ; Immunology ; Research Assays ; Assay Categories

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
