

Human Follicle Stimulating Hormone ELISA Kit | FSH elisa kit

FSH ELISA

CATALOG #
AAA72616

REACTIVITY
Human

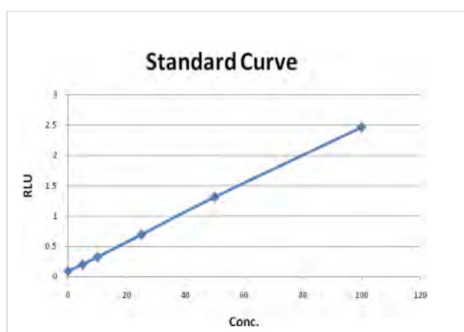

PRODUCT SYNONYMS

Follicle Stimulating Hormone; FSH ELISA; FSH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich
Samples	Human serum
Standards	6 standards, ready to use.
Sample Volume	50 uL / determination.
Design	Solid phase enzyme immunoassay (ELISA).
Assay Description	1 hour incubation (RT) + 15 min. (RT) = 1 hour, 15 min. total incubation time.
Preparation and Storage	2 - 8 degree C

ADDITIONAL INFORMATION

Related Product Information for FSH elisa kit

Principle of the Assay: The FSH ELISA kit is a solid phase assay using streptavidin/biotin method. The samples and Anti-FSH/Anti-Biotin conjugate are added to the wells coated with Streptavidin. FSH in the serum forms a sandwich between specific antibodies labeled with biotin and HRP. Unbound protein and HRP conjugate are washed off by wash buffer. Upon the addition of the substrate, the intensity of color is proportional to the concentration of FSH in the samples. A standard curve is prepared relating color intensity to the concentration of the FSH.

Intended Uses: The FSH ELISA Kit is intended for the measurement of FSH in human serum. For research use only - Not for use in test procedures.

Product Categories/Family for FSH elisa kit
