

Human LY75 (Lymphocyte antigen 75) ELISA Kit | LY75 elisa kit

LY75 (Lymphocyte antigen 75) ELISA

CATALOG #
AAA72683

REACTIVITY
Human

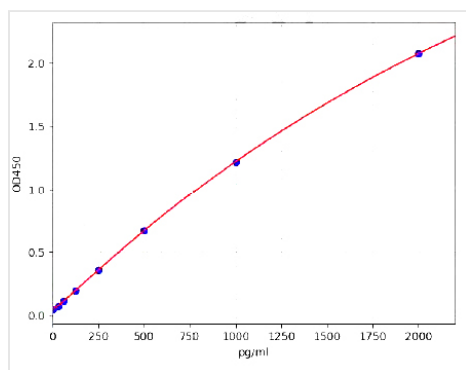

PRODUCT SYNONYMS

LY75 (Lymphocyte antigen 75); LY75 (Lymphocyte antigen 75) ELISA; LY75 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of LY75. No significant cross-reactivity or interference between LY75 and analogues was observed.
Sequence Length	120
Samples	Serum, plasma, tissue homogenates and other biological fluids
Assay Type	Sandwich
Detection Range	31.2 - 2000 pg/mL
Sensitivity	<2 pg/ml
Intra-assay Precision	CV<8%
Inter-assay Precision	CV<10%
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for LY75 elisa kit	Intended Uses: The Human Lymphocyte antigen 75 (LY75) ELISA has been designed for the detection of LY75 in serum, plasma, tissue homogenates and other biological fluids. For research use only, Principle of the Assay: This kit is based on sandwich enzyme-linked immune-sorbent assay technology. Capture antibody is pre-coated onto 96-well plates. And the biotin conjugated antibody is used as detection antibodies. The standards, test samples and biotin conjugated detection antibody are added to the wells subsequently, and washed with wash buffer. HRP-Streptavidin is added and unbound conjugates are washed away with wash buffer. TMB substrates are used to visualize HRP enzymatic reaction. TMB is catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.

NCBI AND UNIPROT INFORMATION

NCBI GI #	958769759
NCBI Official Full Name	LY75, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
