

PDGFR alpha (D842V) Recombinant Protein | PDGFRalpha recombinant protein

PDGFR alpha (D842V), Active

CATALOG # AAA73795	HOST Sf9 insect cells	APPLICATIONS Kinase Assay
------------------------------	---------------------------------	-------------------------------------

PRODUCT SYNONYMS

PDGFR alpha (D842V); Active; CD140A; PDGFR2; MGC74795; Rhe-PDGFRa; PDGFRalpha recombinant protein

PRODUCT SPECIFICATIONS

Host	Sf9 insect cells
Form/Format	Recombinant protein stored in 50mM Tris-HCl, pH7.5, 150mM NaCl, 10mM glutathione, 0.1mM EDTA, 0.25mM DTT, 0.1mM PMSF, 25% glycerol.
Applicable Applications for PDGFRalpha recombinant protein	Kinase Assay
Tag	GST
Species	Human
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

Activity

Specific Activity: Sample Kinase Activity Plot. For specific information on a given lot, see related technical data sheet.

ADDITIONAL INFORMATION

Related Product Information for PDGFRalpha recombinant protein	Recombinant human PDGFR alpha (D842V)(550-end) was expressed by baculovirus in Sf9 insect cells using an N-terminal GST tag. The gene accession number is NM_006206. PDGFRalpha (platelet-derived growth factor receptor a) is a member of the PDGFR family of membrane receptors with intrinsic tyrosine kinase activity. Aberrant expression of PDGFRalpha has been linked to developmental abnormalities in vertebrate models and has been implicated in multiple disease states in humans. There is widespread expression of PDGFRalpha in renal cell types involved in fibrotic and sclerosing processes (1). PDGF and its receptor PDGFRalpha are inducers of fibrosis in the repair phase of inflammatory bowel disease and they may also be involved in the active inflammatory phase (2). PDGFRa(D842V) is one of the mutant forms of PDGFRa.
Product Categories/Family for PDGFRalpha recombinant protein	Mutant Kinases; AKT/PKB Pathway; Cancer; ERK/MAPK Pathway; Receptor Tyrosine Kinases
