

UBE2A recombinant protein

UBE2A, Active

CATALOG # AAA74081	HOST E Coli	APPLICATIONS Western Blot
------------------------------	-----------------------	-------------------------------------

PRODUCT SYNONYMS

UBE2A; Active; HHR6A; MRXS30; MRXSN; RAD6A; UBC; UBE2A recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli
Form/Format	Recombinant protein stored in 50mM sodium phosphate, pH7.0, 300mM NaCl, 150mM imidazole, 0.1mM PMSF, 0.25mM DTT, 25% glycerol.
Applicable Applications for UBE2A recombinant protein	WB (Western Blot)
Tag	HIS
Species	Human
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

Activity

Specific Activity: Sample Activity Plot. For specific information on a given lot, see related technical data sheet.

ADDITIONAL INFORMATION

Related Product Information for UBE2A recombinant protein	Recombinant full-length human UBE2A was expressed in E Coli cells using an N-terminal His tag. The UBE2A gene accession number is NM_003336. UBE2A or ubiquitin-conjugating enzyme E2A is a member of the E2 ubiquitin-conjugating enzyme family which is required for post-replicative DNA damage repair and plays an important role in various cellular processes. RAD18 and RAD5 play a central role in mediating physical contacts between the members of the RAD6 pathway. UBE2A is specifically important during chronic low dose ultraviolet exposure to prevent counterproductive DNA checkpoint activation and allow cells to proliferate normally. Loss of the RAD6 error-free PRR pathway results in DNA damage checkpoint-induced G2 arrest in CLUV-exposed cells.
Product Categories/Family for UBE2A recombinant protein	Ubiquitin Enzymes; Cancer; Cell Cycle; Neurobiology
