| Host                                                  | Rabbit                                                                                                                                                                                                                                                                                              |
| Clonality                                             | Polyclonal                                                                                                                                                                                                                                                                                          |
| Isotype                                               | Rabbit Sera                                                                                                                                                                                                                                                                                         |
| Applicable Applications for anti-Macrophages antibody | IHC (Immunohistochemistry), CA (Cytotoxic Assay)                                                                                                                                                                                                                                                    |
| Test Type                                             | For Cytotoxic Antibodies:<br><br>Modified Colormetric Microtiter Assay <sup>1</sup><br><br>Results:<br><br>Antisera of this lot(5855AD-4) diluted 1:160 exhibits >80% cytotoxicity on rat macrophages.<br>Antisera of this lot(5855AD-4) diluted 1:20 exhibits <20% cytotoxicity on rat thymocytes. |
| Presentation                                          | 2 ml, liquid.                                                                                                                                                                                                                                                                                       |
| Preservatives                                         | None (0.2 um filtered)                                                                                                                                                                                                                                                                              |
| Dry Ice Note                                          | The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.                                                                                                                                                                                                  |
| Preparation and Storage                               | Divide into useful aliquots and store at -20°C.                                                                                                                                                                                                                                                     |

### ADDITIONAL INFORMATION

|                                                           |                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-Macrophages antibody | MBS524051 is a rabbit antiserum directed against rat macrophages. This antiserum is adsorbed repeatedly with rat red blood cells, thymocytes and spleen cells to remove most antibodies to antigens common among different cell types. This adsorption significantly improves cytotoxic specificity. |
