

Mouse Staphylococcus aureus Monoclonal Antibody

Staphylococcus aureus antibody

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA74376	Mouse	Recognizes peptidoglycan of staph. aureus, Protein A negative Staph. aureus and staph. epidermids. No crossreactivity with Streptococcus species, Mycoplasma species or Corynebacteria species.	ELISA

PRODUCT SYNONYMS

Staphylococcus aureus; Monoclonal Antibody; Staphylococcus aureus antibody; Monoclonal Staphylococcus aureus; Anti-Staphylococcus aureus; Anti Staphylococcus aureus; Staph. aureus; anti-Staphylococcus aureus antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Recognizes peptidoglycan of staph. aureus, Protein A negative Staph. aureus and staph. epidermids. No crossreactivity with Streptococcus species, Mycoplasma species or Corynebacteria species.
Clonality	Monoclonal
Isotype	IgG3
Clone Number	M310129
Specificity	Staphylococcus aureus
Form/Format	Purified IgG in, PBS buffer pH 7.4 with 0.1% NaN ₃
Concentration	4.0mg/ml by OD280nm (varies by lot)
Applicable Applications for anti-Staphylococcus aureus antibody	ELISA
Immunogen	UV-inactivated staphylococcus aureus cells
Biological Significance	Staphylococcus aureus is a facultative anaerobic, Gram-positive coccus and is the most common cause of staph infections. It is frequently part of the skin flora found in the nose and on skin. About 20% of the human population are long-term carriers of S. aureus. The carotenoid pigment staphyloxanthin is responsible for S. aureus' characteristic golden colour, which may be seen in colonies of the organism. This pigment acts as a virulence factor with an antioxidant action that helps the microbe evade death by reactive oxygen species used by the host immune system. Staph organisms which lack the pigment are more easily killed by host defenses.
Preparation and Storage	Store at 4°C. May precipitate if frozen.
