

Rabbit Campylobacter jejuni Polyclonal Antibody

Campylobacter jejuni antibody (HRP)

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA74937	Rabbit	Specific for whole cells of Campylobacter jejuni; may react with other related species.	Western Blot, Immunohistochemistry, ELISA

PRODUCT SYNONYMS

Campylobacter jejuni; Polyclonal Antibody; Campylobacter jejuni antibody (HRP); Polyclonal Campylobacter jejuni; Anti-Campylobacter jejuni; anti-Campylobacter jejuni antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Specific for whole cells of Campylobacter jejuni; may react with other related species.
Clonality	Polyclonal
Specificity	Campylobacter jejuni
Form/Format	Purified IgG fraction, supplied in PBS with 1% BSA and 0.002% thimersol.
Concentration	2.0mg/ml (varies by lot)
Applicable Applications for anti-Campylobacter jejuni antibody	WB (Western Blot), IHC (Immunohistochemistry), ELISA
Biological Significance	Campylobacter jejuni is a species of curved, helical shaped, non-spore forming, Gram-negative microaerophilic, bacteria commonly found in animal feces. It is one of the most common causes of human gastroenteritis in the world.
Tag/Conjugate	HRP
Immunogen	Campylobacter jejuni antibody (HRP) was raised in rabbit using strain 29428 as the immunogen.
Usage Recommendations	Optimal conditions to be determined by end user
Biological Significance	Campylobacter jejuni is a species of curved, helical shaped, non-spore forming, Gram-negative microaerophilic, bacteria commonly found in animal feces. It is one of the most common causes of human gastroenteritis in the world.
Preparation and Storage	Store at 4 degree C for short term storage. Store at -20 degree C for long term storage. Avoid repeated freeze/thaw cycles.
