

Goat anti-Human Ferritin Polyclonal Antibody

Ferritin antibody

CATALOG # AAA74962	HOST Goat	REACTIVITY Human
------------------------------	---------------------	----------------------------

PRODUCT SYNONYMS

Ferritin; Polyclonal Antibody; Ferritin antibody; Polyclonal Ferritin; Anti-Ferritin; Ferritin light chain like; Ferritin H subunit; FTH; Ferritin light polypeptide; Ferritin L subunit; Ferritin heavy chain like; Ferritin heavy polypeptide 1; Ferritin heavy polypeptide; anti-Ferritin antibody

PRODUCT SPECIFICATIONS

Host	Goat
Reactivity	Human
Clonality	Polyclonal
Specificity	Human
Form/Format	PBS buffer, pH 7.2 with 0.1% NaN ₃ .
Biological Significance	Ferritin is a ubiquitous intracellular protein that stores iron and releases it in a controlled fashion. The protein is produced by almost all living organisms, including bacteria, algae and higher plants, and animals. In humans, it acts as a buffer against iron deficiency and iron overload.
Biohazard Information	This product contains sodium azide as preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
Affinity Constant	3×10^{10} l/mol
Immunogen	Ferritin antibody was raised in goat using ferritin from the human Liver as the immunogen.
Preparation and Storage	Store at 4 degree C. DO NOT FREEZE.
