

Goat anti Pig IgG Fc (HRP) Secondary Antibody | IgG Fc secondary antibody

Goat anti Pig IgG Fc (HRP)

CATALOG # AAA75537	HOST Goat	REACTIVITY Specific for PIG IgG Fc.	APPLICATIONS Western Blot, ELISA
------------------------------	---------------------	---	--

PRODUCT SYNONYMS

Goat anti Pig IgG Fc (HRP); Goat anti Plmmunoglobulin Immunoglobulin G Fc secondary (HRP); IgG Fc secondary antibody

PRODUCT SPECIFICATIONS

Host	Goat
Reactivity	Specific for PIG IgG Fc.
Specificity	Pig
Purity/Purification	Goat anti Pig IgG Fc (HRP) was purified by affinity chromatography.
Form/Format	Liquid with 50 mM HEPES-Saline with stabilized, 0.02% Thimerosal as a preservative.
Concentration	1.0 mg/ml (varies by lot)
Applicable Applications for IgG Fc secondary antibody	WB (Western Blot), ELISA
Immunogen	Goat immunized with a highly purified pig IgG-Fc fragment.
Biological Significance	Immunoglobulin G (IgG) are antibody molecules. Each IgG is composed of four peptide chains - two heavy chains ? and two light chains. Each IgG has two antigen binding sites. Other Immunoglobulins may be described in terms of polymers with the IgG structure considered the monomer. The Fc (Fragment, crystallizable) region is composed of two heavy chains that contribute two or three constant domains depending on the class of the antibody. Thus, the Fc region ensures that each antibody generates an appropriate immune response for a given antigen.
Tag/Conjugate	HRP
Preparation and Storage	Store at 4°C.

ADDITIONAL INFORMATION

Related Product Information for IgG Fc secondary antibody	Goat anti Pig IgG Fc secondary antibody (HRP)
Product Categories/Family for IgG Fc secondary antibody	Immunology ; Conjugated Secondary Antibodies

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
