SARS Nucleocapsid protein N2 Recombinant

CATALOG #	HOST
AAA76061	E Coli (Host protein expression may be lot-specific and can be subject to change during production, including bulk orders)

PRODUCT SYNONYMS

SARS Nucleocapsid protein N2; SARS Nucleocapsid protein N2 Recombinant; sars; nucleocapsid; SARS N recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli (Host protein expression may be lot-specific and can be subject to change during production, including bulk orders)
Purity/Purification	>95%, as determined by SDS-PAGE.
Form/Format	Lyophilized from 50mM Tris-HCl, 60mM NaCl and 50% glycerol.
Sequence Length	422
Host Note	DNA sequence encoding immunodominant fragment of SARS Nucleocapsid protein was expressed in Escherichia Coli.
Reconstitution	A quick spin of the vial followed by reconstitution in distilled water to a concentration not less than 0.1 mg/mL. This solution can then be diluted into other buffers.
Molecular Weight Note	Recombinant SARS N encodes the C terminal immunodominant sequences of the SARS Nucleocapsid protein. Recombinant SARS N contains an N terminal GST purification tag and migrates as an approximately 43 kDa protein under non-reducing conditions and reducing conditions in SDS-PAGE.
Preparation and Storage	The lyophilized protein is stable for at least 2 years from date of receipt at -20 degree C. Upon reconstitution, this protein can be stored in working aliquots at 2 degree - 8 degree C for one month, or at -20 degree C for six months, with a carrier protein without detectable loss of activity. Avoid repeated freeze/thaw cycles.
