

HLA-A*02:01 NY-ESO-1 Recombinant Protein | NY-ESO-1 recombinant protein

HLA-A*02:01 NY-ESO-1 peptide complex

CATALOG #	HOST
AAA76360	HEK cells (Note: Host protein expression may be lot-specific and can be subject to change during production, including bulk orders.)

PRODUCT SYNONYMS

HLA-A*02:01 NY-ESO-1; HLA-A*02:01 NY-ESO-1 peptide complex; NY-ESO-1 recombinant protein

PRODUCT SPECIFICATIONS

Host	HEK cells (Note: Host protein expression may be lot-specific and can be subject to change during production, including bulk orders.)
Purity/Purification	purity was determined to be >95% by nonreducing PAGE and HPLC
Form/Format	Recombinant (HLA-A*02:01) NY-ESO1 complex was lyophilized from 0.2 um filtered PBS solution pH7.4
Source	DNA sequence encoding the Human (HLA-A*02:01) AA25-305 [accession# P04439] and the B2M protein AA2-119 [accession# P61769], fused to the mutant NY-ESO-1 epitope SLLMWITQC. This complex includes a C terminal polyHis and was expressed in HEK cells.
Endotoxin	Endotoxin content was assayed using a LAL gel clot method. Endotoxin level was found to be less than 0.1 ng/ug (1EU/ug).
Reconstitution	A quick spin of the vial followed by reconstitution in distilled water to a concentration not less than 0.1 mg/mL. This solution can then be diluted into other buffers.
Preparation and Storage	The lyophilized protein is stable for at least 2 years from date of receipt at -20 degree C.

IMAGES

SDS-PAGE

1ug loaded Tris-Bis PAGE under reducing condition. The purity is greater than 95%.

ELISA

HLA-A*02:01 NY-ESO-1 peptide complex ELISA Dose response curve for Anti-HLA-A*02:01 NY-ESO-1 Antibody

Application Data

HLA-A*02:01 NY-ESO-1 peptide complex SPRSPR image shows curve for HLA-A*02:01 NY-ESO-1 and immobilized Antibody binding, with a calculated affinity constant of 14nM

ADDITIONAL INFORMATION

Product Categories/Family for NY-ESO-1 recombinant protein

MHC peptide complexes

NCBI AND UNIPROT INFORMATION

Molecular Weight

Recombinant HLA-A/NY-ESO-1 has a calculated mass of approximately 50kDa. Due to glycosylation migrates as an approximately 60 kDa protein under reducing conditions in SDS-PAGE.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
